EDUCATION

San Jose State University

Master of Science – Computer Science

Expected: May 2028

Bachelor of Science – Computer Science

GPA: 3.65 | Dec 2025

- **Relevant Coursework:** Data Structures and Algorithms, Information Security, Database Systems, Operating Systems, Computer Architecture, Artificial Intelligence, Machine Learning, Object-Oriented Programming, Software Engineering

EXPERIENCE

Tech Lead

San Jose, CA

SJSU Applied Software Engineering

Aug 2026 – Present

- Optimize team deployment velocity by architecting full-stack repository structures and automating CI/CD pipelines
- Architect OS-style web app; direct tech design for GPA, course planning, professor rating, and syllabus features
- Deliver a production campus hub for 40K+ target students by translating complex product data into sprint specs

Web Development Co-Lead

San Jose, CA

Responsible Computing Club

Aug 2026 – Present

- Co-lead 10+ web developers and UI/UX ambassadors to execute a comprehensive student organization web redesign
- Direct the tech roadmap with a focus on responsible computing principles, data privacy, and ethical design choices
- Manage cloud deployments and DevOps, auditing project dependencies to resolve critical security vulnerabilities

Founding Software Engineer

San Diego, CA

Betty

Jun 2025 – Jun 2026

- Architected 0-to-1 React Native MVP; turned 15+ Figma designs into reusable components to launch 100% of user flows
- Built 5-game scoring engine, ensuring bug-free state transitions by authoring 60+ Jest tests with mocked Firebase states
- Deployed beta app to 10+ trial users via Apple TestFlight, accelerating product stability by catching critical runtime bugs

Web Developer

Sunnyvale, CA

Freelance / Be-Ti-Ful Salon

Mar 2026 – Apr 2026

- Converted 5+ new clients within 30 days by engineering an end-to-end responsive website for Be-Ti-Ful Salon
- Enabled dynamic data rendering 100% via API fetches by integrating a decoupled Sanity.io headless CMS

Software Engineer Intern

San Jose, CA

SJSU Software & Computer Engineering Society

Jun 2024 – Aug 2024 | Jun 2025 – Aug 2025

- Processed 400+ Discord onboardings by developing an automated server role assignment feature
- Boosted website performance by reducing JavaScript bundle size by 30% through strategic code splitting
- Delivered low-latency playback to 2,000+ active members by building a Node.js/TypeScript audio streaming bot

PROJECTS

Pazetracker | *Node.js, PostgreSQL, Redis*

- Mapped 35K+ Paze locations, increasing merchant visibility via a Node.js and MapLibre GL JS web application
- Launched promo tracking feature capturing 50+ redemptions, securing \$400 in user statement credits via crowdsourcing
- Maintained 1ms p50 latency over 26.5K+ requests by leveraging Railway to scale containerized web infrastructure

RepoScanner | *Next.js, Node.js, TypeScript, Python, SQL*

- Made a security platform to detect exposed API keys and vulnerable dependencies in GitHub repositories
- Earned 2nd in “Best Cyber Security Project” out of 36 teams at SJSU’s SCE hacks 1.0 hackathon

SKILLS

- **Languages & Frontend:** Python, Java, C++, JavaScript, TypeScript, React, Next.js, React Native, Tailwind CSS
- **Backend & Cloud:** Node.js, FastAPI, REST APIs, Docker, AWS (S3, EC2), CI/CD
- **Databases & Tools:** MySQL, PostgreSQL, MongoDB, Git, Linux/Unix, Postman, Agile/Scrum
